Section4-FirstAidMeasures	

4.1 Description of first aid measures

Inhalation	• Move victim to fresh air. Give artificial respiration if victim is not breathing. Administer oxygen if breathing is difficult. If signs/symptoms continue, get medical attention.
Skin	• In case of contact with substance, immediately flush skin with running water for at least 20 minutes. Wash skin with soap and water. Get medical attention if symptoms occur.
Еуе	 Immediately flush eyes for at least 15 minutes. If eye irritation persists: Get medical advice/attention.
Ingestion	• Rinse mouth. Do not give anything by mouth to an unconscious person. Get medical attention if symptoms occur.
4.2 Most important symp	toms and effects, both acute and delayed
	Refer to Section 11 - Toxicological Information.
4.3 Indication of any imm	ediate medical attention and special treatment needed
Notes to Physician	• No specific actions or treatments recommended related to exposure to this material.

Section5-FirefightingMeasures

5.1 Extinguishing media

Suitable Extinguishing Media	 In case of fire use media as appropriate for surrounding fire.
Unsuitable Extinguishing Media	No data available
5.2 Special hazards arisi	ng from the substance or mixture
Unusual Fire and Explosion Hazards	 Nonflammable, however sparks from welding or grinding in user operations could ignite flammable or combustible liquids, vapors and solids.
Hazardous Combustion Products	No data available
5.3 Advice for firefighters	6
	 Wear positive pressure self-contained breathing apparatus (SCBA). Structural firefighters' protective clothing will only provide limited protection.

Structural firefighters' protective clothing will only provide limited protection. Fire fighters should wear complete protective clothing including self-contained breathing apparatus.

Section6-AccidentalReleaseMeasures

6.1 Personal precautions, protective equipment and emergency procedures

Personal Precautions

 Under normal circumstances the materials do not produce any hazardous products and as such do not require any special precautions. Use appropriate Personal Protective Equipment (PPE)

- Emergency Procedures
- No emergency procedures are expected to be necessary if material is used under ordinary conditions as recommended.

6.2 Environmental precautions

• No special precautions are necessary.

6.3 Methods and material for containment and cleaning up

Containment/Clean-up Measures Vacuum or shovel any spilled material into a suitable container. Alloy wastes are normally collected to recover metal values.

6.4 Reference to other sections

 Refer to Section 8 - Exposure Controls/Personal Protection and Section 13 - Disposal Considerations.

Section7-HandlingandStorage

7.1 Precautions for safe handling

Handling

 Under normal circumstances the materials do not produce any hazardous products and as such do not require any special precautions. The transient handling of the materials would not be expected to produce any sensitization but it is good practice to use gloves for handling. The normal precautions for handling heavy objects with possible sharp edges should also be observed. If dusts/fumes are created during processing wear appropriate personal protective equipment. Do not breathe dust or fumes. Wash thoroughly after handling.

7.2 Conditions for safe storage, including any incompatibilities

Storage

• Store in a dry place.

7.3 Specific end use(s)

• Refer to Section 1.2 - Relevant identified uses.

8.2 Exposure controls

Engineering	
Measures/Controls	

Respiratory

 Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level.

Personal Protective Equipment

 For limited exposure use an N95 dust mask. For prolonged exposure use an airpurifying respirator with high efficiency particulate air (HEPA) filters. Follow the OSHA respirator regulations found in 29 CFR 1910.134 or European Standard EN 149. Use a

•	, .			
Skin/Body	vvear appropriate g	gioves.	Wear long sleeves and/or protective coveralls.	
Environmental Exposure Controls	• Follow best practice for site management and disposal of waste.

Potential Health Effects

Inhalation	
Acute (Immediate)	 May cause respiratory irritation. Processes such as cutting, grinding, crushing, or impact may result in generation of excessive amounts of airborne dusts in the workplace. Nuisance dust may affect the lungs but reactions are typically reversible.
Chronic (Delayed)	 Repeated and prolonged exposure to dust may cause lung effects including pneumoconiosis. May cause allergy or asthma symptoms or breathing difficulties if inhaled. Prolonged exposure to manganese fumes and dusts has resulted in a progressive deterioration of the Central Nervous System. Symptoms resemble late Parkinsons disease and include weakness in the legs, increased muscle tone, hand tremor, slurred speech, muscle cramps, spastic gate, fixed facial expression and mental deterioration.
Skin	
Acute (Immediate)	 Exposure to dust may cause mechanical irritation. May cause skin sensitization. Symptoms include redness, and skin rash.
Chronic (Delayed)	No data available.

Еуе	
Acute (Immediate)	 Exposure to dust may cause mechanical irritation. Excessive concentrations of nuisance dust in the workplace may reduce visibility and may cause unpleasant deposits in eyes.
Chronic (Delayed)	No data available.
Ingestion	
Acute (Immediate)	 Excessive concentrations of nuisance dust in the workplace may cause mechanical irritation to mucous membranes.
Chronic (Delayed)	No data available.
Carcinogenic Effects	 Repeated and prolonged exposure may cause cancer.
